Accuracy, straight down the line.

Portfolio analysis and risk management
The Yield Book is a trusted and authoritative source for fixed income analytics that enables market makers and institutional investors to perform complex and accurate portfolio analysis and risk management.
The Yield Book products offer analytical insight into an extensive range of financial products in the fixed income space including Governments, Agencies, Corporates, High Yield, Emerging Markets, Mortgages, ABS, CMBS, CMOs, and Derivatives.

Powerful technology utilizing dedicated centralized servers ensures reliable, prompt data delivery.

Our global team of analysts and engineers provide training, analytics, usage, and technical support to customers around the world.

For over twenty-five years, we have built a track record of client engagement with a wide range of the largest and most sophisticated financial institutions including:

- 92% of the largest 50 US Fixed Income Money Managers
- Investment management firms, banks, central banks, insurance companies, pension funds, and hedge funds
- A large number of US broker-dealers, including many regional dealers
- Institutions worldwide in North and Latin America, Japan and Asia-Pacific, Europe, and the Middle East

Now in its third decade, The Yield Book carries on its legacy of helping clients distill large quantities of complex data in order to reach a decision point.

80 million calculations every 24 hours.

Trust

Trusted by both buy-side and sell-side professionals to perform complex and accurate calculations, The Yield Book is genuinely market-tested in the real world, in real time.

Commitment

Unwavering client commitment has driven our business since its inception in 1989. We put our clients in control with tools that work for them. We support them 24/7 with the highest level of personalized service.

THE YIELD BOOK

Analyze portfolio positions, quantify risk, and identify drivers of performance with the help of a complete portfolio analytics solution

Analysis of Single Securities and Portfolios
• View the impact of trades in real time
• Evaluate the portfolio on an absolute basis or relative to a benchmark
• Extract and visualize the most important and relevant information using customized report templates

Scenario Analysis
• Generate cash flow and return projections based on user-defined shifts for interest rates, spreads, currencies, volatilities, and prepayments

Return Attribution
• Understand key drivers of total return using factors such as yield curve movements, spread changes, volatility fluctuations, and prepayments
• Customize sectors based on your portfolio structure, and evaluate sector and issue allocations
• Understand / evaluate effectiveness of currency hedging in multi-currency portfolios

Tracking Error and Value-at-Risk (VaR)
• Isolate and measure the components of risk and potential sources of return with a Monte Carlo simulation-based approach

Optimization
• Make informed decisions around trade weighting, portfolio optimization relative to a benchmark, hedging a portfolio, and more

Automation
• Base your analysis on up-to-date information: automated overnight processes update portfolios, analytics, and reports so that data from the previous market close is available at the start of each business day
